

MURNIA®
Science that *Soothes.*

A New Way to *Soothe* Persistent Oral Dryness and *Support* Oral Health

Murnia™ Mouth Spray

Murnia™ Mouth Spray delivers fast-acting moisture and intense soothing relief with a unique blend of Betaine and Hyaluronic Acid in an all-natural, alcohol-free formula. Its neutral pH and patented compound help maintain a healthy oral environment while rapidly restoring moisture and protecting soft oral tissues for long-lasting comfort.

New!

Intense Moisture

Betaine and Hyaluronic Acid provide soothing moisture and water retention.

Neutral pH Level

Formulated with neutral pH level of 7. Ideal oral pH level is critical for oral and dental health.

Proven

Patented Murnia Molecular Compound born from cancer wound care.

All-Natural

Made only with natural ingredients. Free from alcohol and harsh chemicals.

Safe to Swallow

Gentle, effective formula with natural, safe and well-known ingredients.

Portable and Compact

Easy to carry and discreet to use whenever, wherever.

✓ Use as Needed

Suitable for use multiple times throughout the day and night to soothe the feeling of dryness.

✓ Neutralizing

Good to use after meals, consumption of acidic or sugary foods.

✓ Natural Relief

Reduces discomfort for those with braces, dentures or during implant treatments.

✓ Daily Maintenance

For easy on-the-go oral health maintenance in between dental visits.

Ingredients: Aqua, Commiphora Myrrha Resin Extract, Betaine, Glycerin, Stevia Rebaudiana Extract, Hyaluronic Acid, Xanthan Gum, Sorbitan Caprylate, Propanediol, Benzoic Acid, Calcium Carbonate, Citrus Sinesis Oil.

What Patients Are Saying

I am using Murnia™ Mouth Spray consistently. Especially at night, the dryness used to be extremely uncomfortable. With the spray, the feeling of dryness has decreased. I will continue to use it. I am very satisfied and thankful.

– Tefvik O. (65)

I used Murnia™ Mouth Spray after receiving dental implants. After my tooth was removed, I used the Mouth Spray and it helped soothe my discomfort immensely. I will use it after the implant treatment is finished as well.

– Elif E. (54)
