Science that *Soothes*.

Murnia™ Mouth Spray

Frequently Asked Questions

What patients are ideal for Murnia™ Mouth Spray?

Murnia™ Mouth Spray can provide benefit for all patients looking to **proactively** manage their oral routine or wellness – with a **neutral ph of 7**, it is good to use and refresh after coffee, tea or sugar consumption. A neutral oral ph is known to reduce risk of dental caries, gum and periodontal risk factors.

In addition, for patients struggling with persistent oral dryness, a frequent effect of prescription medicine use, Murnia™ Mouth Spray offers **natural, intense moisture that provides quick soothing relief** to the mouth, anywhere, anytime.

What are the key ingredients?

- Murnia™ Mouth Spray has **clean, natural** ingredients.
- **Distilled water (removed of impurities) as primary base.**
- Natural **betaine (from sugar beets)** and **hyaluronic acid** for intense moisture, water balance and retention.
- Natural patented molecular compound.

All-Natural Ingredients:

Aqua, Commiphora Myrrha Resin Extract, Betaine, Glycerin, Stevia Rebaudiana Extract, Hyaluronic Acid, Xanthan Gum, Sorbitan Caprylate, Propanediol, Benzoic Acid, Calcium Carbonate, Citrus sinensis Oil.

How often can Murnia™ be used?

Murnia™ Mouth Spray features an all-natural, clean formulation free from synthetic chemicals, additives or alcohol. With its convenient, portable spray it can be used anytime, anywhere as needed. Recommend 4–8 sprays per use, up to 10 times daily.

How do patients administer Murnia™ Mouth Spray?

1 Attach Pump Arm

Remove original shipping bottle cap. Insert the pump arm, tighten.

3 Spray into Mouth

Press down to pump liquid. Liquid will spray from the tip of the extender arm.

2 Extend Pump Arm

Prior to first use, extend applicator arm. Use applicator arm to reach front and back of the mouth.

4 Repeat as Desired

Recommended: 4-8 pumps per use for full coating of mouth.

How is Murnia™ different than other products?
